

Script 1

Graphic Organizers: In Conclusion

These are only a few examples of graphic organizers that can help you take notes. Don't be shy to look up graphic organizers on the internet; There are many types available for all kinds of needs.

...

Remember! While you're listening or viewing:

-Don't try to write everything down.

Instead,

-Use keywords or write in point form.

-Use abbreviations.

You may not understand all the words. That's ok. Use visual cues to help you. You can also listen to the audio clip or watch the video more than once, so there's no need to be discouraged if you don't get it the first time around.

Also, try to take notes using paper instead of a computer. Why? There are fewer distractions, and you won't have to switch back and forth from one window to the next when you actually need to answer the questions.
