### Multiple choice question

Sheet to be completed - 1

Lesson : 2.5.4

QUESTION:

**Identify the switches that are connected to the suspension system.**

ANSWER CHOICE: Only one answer possible  
Several possible answers **X**

A)

B)

C)

D)

Refer to if wrong answer: **Lesson 2.5.4 from the student's workbook.**

## Multiple choice question

---

Sheet to be completed - 2

Lesson :2.5.4

QUESTION:

**What is the role of suspension?**

ANSWER CHOICE: Only one possible answer **X**  
Several possible answers

A) Riding comfort

B) Protect cargo

C) Ensure that the wheels remain in contact with the ground and reduce the impact of road irregularities

D) All of the above

Refer to if wrong answer: **Lesson 2.5.4 from the student's workbook.**

## Multiple choice question

---

Sheet to be completed - 3

Lesson :2.5.4

QUESTION:

**Which of the following statements is false?**

ANSWER CHOICE: Only one possible answer **X**  
Several possible answers

A) The GVWR, indicated in the door frame, specifies the maximum permissible mass on the steering axle.

B) The suspension switch dumped the air pressure inside the air bags before uncoupling.

C) A self-steering is an axle that can be lifted when turning conditions are very difficult.

D) There are two types of gauges connected to the suspension system. A PSI pressure gauge (psi) and a gauge showing the weight in pounds or kg on the axle group.

Refer to if wrong answer: **Lesson 2.5.4 from the student's workbook.**

## Multiple choice question

Sheet to be completed - 4

Lesson : 2.5.4

QUESTION:

**Which is the most used type of suspension in the industry?**

ANSWER CHOICE: Only one possible answer **X**  
Several possible answers

A) Rubber cushions

B) Spring leaf

C) Air ride suspension

D) All of the above

Refer to if wrong answer: **Lesson 2.5.4 from the student's workbook.**

## True or False

Sheet to be completed - 5

Lesson : 2.5.4

QUESTION:

**When the parking brake is applied on a trailer during loading or unloading, the "Surelok" system is a mechanism that prevents the collapse of the suspension of a semi-trailer.**

ANSWER CHOICES :

TRUE

FALSE

Refer to if wrong answer: **Lesson 2.5.4 from the student's workbook.**

## True or False

Sheet to be completed - 6

Lesson : 2.5.4

QUESTION:

**The higher the weight of the load, the higher the pressure will be on the suspension pressure gauge.**

ANSWER CHOICES :

TRUE

FALSE

Refer to if wrong answer **Lesson 2.5.4** from the student's workbook.

Sheet to be completed - 7

Lesson: 2.5.4

QUESTION:	
<b>Why must the tractor suspension be deflated when uncoupling a semi-trailer?</b>	
ANSWER CHOICE: Only one possible answer <b>X</b> Several possible answers	
A) To avoid breaking the fifth.	
B) To avoid flat tire on the tractor.	
C) To prevent any damages of the suspension parts.	
D) To prevent transmission damages.	
Refer to if wrong answer: <b>Lesson 2.5.4 from the student's workbook.</b>	

## True or False

---

Sheet to be completed - 8

Lesson : 2.5.4

QUESTION:

**We can drive a truck on the road with a deflated or non-functional suspension.**

ANSWER CHOICES :

TRUE	
FALSE	

Refer to if wrong answer: **Lesson 2.5.4 from the student's workbook.**
