**Freightliner  
 Service Bulletin**

## General Information

Vehicles built between June 1, 2011, and October 1, 2011, may have an alternate transmission interface connector installed due to a shortage from the supplier. See [Fig. 1](#) and [Fig. 2](#).

**Fig. 1, Standard Transmission Interface Connector**

**Fig. 2, Alternate Transmission Interface Connector**

The alternate connector is mapped 1-to-1 with the standard connector, and the wiring remains the same. Refer to [Table 1](#) for connector and terminal details.

Connector and Terminal		
Connector	Standard Connector	Alternate (Temporary) Connector
Connector	23-13153-056	23-13153-064
Terminal Pin	23-13211-021	23-13211-400

**Table 1, Connector and Terminal**

## Warranty

This is an informational bulletin only. Warranty does not apply.
