INTRODUCTION

1 INTRODUCTION

The Carrier Transicold model 68RF313 series units are of lightweight frame construction, designed to be installed on the vehicle roof.

2 CONFIGURATION IDENTIFICATION

Unit identification information is provided on a plate located inside the condenser and evaporator sections. The plate provides the unit model number, the unit serial number and the unit parts identification number (PID). The model number identifies the overall unit configuration while the PID provides information on specific optional equipment and differences in detailed parts.

This manual provides a description of and a tabular listing of unit model numbers and PID numbers to assist the reader in identifying the equipment supplied and any required service parts.

3 OPTION DESCRIPTION

Various options may be factory or field equipped to the base unit. These options are listed in the tables and described in the following subparagraph.

3.1 Refrigeration Kit - Evaporator

The units are assembled to allow orientation of the connections for different mounting arrangements and may be supplied with various piping layouts for specific applications.

The evaporator assembly can also be configured as a stand-alone roof-top heater assembly (no cooling).

3.2 Condenser

The units may be assembled with or without service valves.

3.3 Motors

The units may be supplied with 24 VDC permanent magnet (PM) motors or 24 VDC brushless motors (BM).

3.4 Air Exchange/Controller

The unit is fitted with an air exchange of 0-100% and three different style controllers.

4 ORDERING INSTRUCTIONS

All orders and inquiries for parts must include: Unit Serial Number, Part No., PID number, description of part as shown on list and quantity required. Address all correspondence for parts to the following address or Fax number:

MAIL : CARRIER TRANSICOLD DIVISION
Replacement Components Group, TR-20
P.O. Box 4805
Syracuse, NY 13221
FAX: (315) 432-3778

5 GENERAL NOTES

To find replacement parts, determine major group in which replacement part is located. Consult table of

contents for the appropriate page for the illustrated breakdown of the replacement part. The following letter designations are used to classify parts throughout this list.

A/R *As Required*

NSA *Not Stock Assembly* - Order components listed under the assembly.

NSS *Not Sold Separately* - Order next higher assembly or kit.

P-- *Suffix P--* added to part number means part is available in packaged quantity only.

PL *Purchase Locally.*

SST *Stainless Steel* - 300 Series unless otherwise specified.

SV *Suffix SV* added to part number designates service replacement part.

NS *Not Shown* on illustration.
