INTRODUCTION

1 INTRODUCTION

The Carrier Transicold model 68RF series units are of lightweight frame construction, designed to be installed on the vehicle roof.

2 CONFIGURATION IDENTIFICATION

Unit identification information is provided on a plate located inside the condenser and evaporator sections. The plate provides the unit model number, the unit serial number and the unit parts identification number (PID). The model number identifies the overall unit configuration while the PID provides information on specific optional equipment and differences in detailed parts.

The following paragraph provides descriptions of the options provided. A tabular listing of unit model numbers and PID numbers, used to assist the reader in identifying the equipment supplied and any required service parts, is provided in Table 1-2 and Table 1-3

3 OPTION DESCRIPTION

Various options may be factory or field equipped to the base unit. These options are listed in Table 1-1 and described in the following subparagraphs.

3.1 Condenser Cover (Skins)

The condenser section may be fitted with one of three different cover assemblies dependent upon the curvature of the bus roof. The cover assemblies available are the standard, standard "China" and 180 inch radius cover.

3.2 Condenser/Evaporator Electrical Kit

The 68RF353 systems are available with either 24 Volt permanent magnet motors or 24 Volt brushless motors.

3.3 Condenser Refrigerant Kit

The 100 Series condensers are all fitted with the same Refrigerant Kit. The 101 Series units may be fitted with one of three different kits. The 101 Series Kits include: condensers fitted with service valves and a check valve, condensers with no service valves and fitted with a check valve and condensers fitted with service valves and no check valve.

3.4 Evaporator Frame Kit

The evaporator may be fitted with one of ten different base assemblies, depending if 100 (4 Assemblies) or 101 series (6 Assemblies) and whether the condenser is located in the front or rear. The assemblies allow fitting of different air exchange equipment, ESS Air Coolers and Spoiler Brackets.

3.5 Evaporator Cover (Skins)

The evaporator section may be fitted with one of seven different cover assemblies. A standard cover, a standard "China" cover, a 180 inch radius cover, an evaporator only with end caps, an evaporator only with grey end caps, evaporator only with safety option or evaporator only with safety option & grey.

3.6 Evaporator Refrigeration Kit

The Evaporator units are assembled to allow orientation of the connections for different mounting arrangements and may be supplied with various piping layouts for specific applications, including the ESS Air Cooler and Heat only application.

3.7 Air Exchange/Controller

The unit may be fitted with either an air exchange assembly or an air exchange blankoff plate. Air exchange assemblies may be of the 0 & 20% opening, 0 & 100 % opening or customer preset type.

The customer preset air exchange uses a special controller.

There is also the heat only multiplex and the 05G Micromax kit.

4 GENERAL NOTES

To find replacement parts, determine major group in which replacement part is located. Consult table of contents for the appropriate page for the illustrated breakdown of the replacement part. If options are listed for the group in which the part is located, consult Table 1-2 or Table 1-3 to identify the option for your particular unit.

The following letter designations are used to classify parts throughout this list.

A/R *As Required*

NSA *Not Stock Assembly* - Order components listed under the assembly.

NSS *Not Sold Separately* - Order next higher assembly or kit.

P-- *Suffix P--* added to part number means part is available in packaged quantity only.

PL *Purchase Locally.*

SST *Stainless Steel* - 300 Series unless otherwise specified.

SV *Suffix SV* added to part number designates service replacement part.

NS *Not Shown* on illustration.

5 ORDERING INSTRUCTIONS

All orders and inquiries for parts must include: Unit Serial Number, Part No., PID number, description of part as shown on list and quantity required. Address all correspondence for parts to the following address or Fax number:
